¹ Students should consult with an academic or faculty advisor or transfer institution (university) when selecting mathematics options to satisfy their degree plan.

² Corresponding labs for science lectures are not considered core curriculum requirements. However, student is strongly encouraged to verify if lab component is required for their program of study since most universities require labs, especially for science majors. Student must contact transfer institution prior to registering or deferring to register for any science lab component.

³ Eighteen hours of field of study elective courses are required. These are based on student's declared major and transfer institution (university). Student is strongly encouraged to consult with an academic or faculty advisor for appropriate field of study electives.
