AUTOMOTIVE-COLLISION REPAIR TECHNOLOGY

The Automotive collision Repair Technology Program at Laredo College is designed to prepare students for a dynamic career in the collision repair industry. With a focus on both technical skills and industry standards, this program provides comprehensive education that equips graduates to excel in a rapidly evolving field. Students receive extensive practical training to develop skills in body repair, painting, and refinishing techniques. This program prepares students for industry-recognized certifications, including I-CAR and ASE, which enhance employability and professional credibility. Laredo College's dedicated faculty and staff offer personalized support, helping students navigate their educational journey and career paths. Transform your passion for automotive repair into a fulfilling career in a growing industry.

Students must possess the reading, writing, and math skills necessary to enter the program. They should consult with a program advisor for entry level requirements.
