

ELECTRICAL TECHNOLOGY

The Electrical Technology program at Laredo College prepares students for a successful career in the electrical industry by providing a comprehensive education in electrical systems, theory, and applications. This hands-on program emphasizes both foundational knowledge and practical skills, equipping students to meet the demands of various sectors, including residential, commercial, and industrial electrical work. The Laredo College Electrical Technology program offers a rigorous educational experience that combines theory with practical application. Graduates will be well-prepared to enter a dynamic and essential industry, contributing to the safe and efficient use of electrical systems in their communities.
