

LOGISTICS AND DISTRIBUTION

The Logistics and Distribution program prepares students for a career in logistics, distribution, and international trade. Students will gain hands-on experience through cooperative education and deepen their understanding of import regulations and compliance. The program integrates core business principles, economic theory, and essential communication skills, while offering flexibility in mathematics, social sciences, and cultural studies to broaden the students' perspective. Graduates will be well-equipped for various roles in logistics management, global trade, and supply chain operations, making them valuable assets in the global marketplace.
